

Constant Pressure Cylinder Stands

DCG's Constant Pressure Cylinder (CPC) Stands eliminate the question "Where do I put my CPC's when calibrating or running samples?" Made of steel the CPC Stand is durable. This unique design provides for many advantages. Laboratory clutter is reduced. They are easy to move, height adjustable, fit different size CPC's and have a small footprint requiring very little floor space. A low center of gravity adds to stability. Lifting of CPC's is eliminated once the cylinder is installed on the stand. The CPC stands rotating feature allows for the mixing of cylinders while the CPC is safely secured on the stand; most importantly though, the CPC stand allows you to keep your cylinders away from the instrument for safety. Please contact your DCG Technical Specialist for more information regarding this product.
