

Cylinder Carriages

DCG Cylinder Carriages are portable cylinder holders that make it easy to move and use calibration standards in smaller cylinders. Made of steel the Cylinder Carriage is durable and can be built to hold different size cylinders. This unique design provides for many advantages. Laboratory clutter is reduced. They are easy to move and have a small footprint requiring very little floor space. A low center of gravity adds to stability. Lifting cylinders is eliminated once the cylinders are installed in the Carriage. A convenient shelf is built into the Carriage for equipment storage. Most importantly, the Cylinder Carriage allows you to keep your cylinders away from the instrument for safety. Please contact your DCG Technical Specialist for more information regarding this product.
