

Pre-Insulated Heated Tubing

Cellex TubeTrace® pre-insulated and heat traced tubing is for instruments impulse lines and process and gas analyzers. It is available in long length coils in a variety of configurations with tube types to meet your specifications. these include welded or seamless stainless steel, copper, fluoropolymers, Hastelloy™, Monel™, and titanium. TubeTrace® is thermally insulated with a nonwicking glass fiber and covered with a weatherproof outer polymer jacket.

Because TubeTrace® includes the process tubing, heat tracing, thermal insulation and weather barrier, installation times are significantly reduced with an overall lower installed cost. Electrically heated TubeTrace® bundles are exclusively available with the full line of Thermon electric heat tracing products including HPT™ power-limiting and SX™ self-regulating cables.

TubeTrace® Type SE/ME

with SX Self-Regulating Heating Cable

- For “winterization” and maintaining temperatures to 250°F (121°C). Withstands high temperature exposure to 375°F (191°C).
- Cut to any length
- Cannot overheat
- Approved for hazardous areas

TubeTrace® type SE/ME

with HPT power-Limiting Heating Cable

- For “winterization” and maintaining temperatures to 400°F (204°C). Withstands high temperature exposure to 500 °F (260°C).
- Cut to any length
- Custom configurations available
- Approved for hazardous areas

TubeTrace® type SI/MI

with Steam or Fluid “Light Traced” Tubing

- For “winterization” and maintaining temperatures to 250°F (121°C).
- Lower installed cost vs. “hard piping”
- Eliminates hot spots
- consistent and predicable temperatures

TubeTrace® type SP/MP

with Steam or Fluid “Heavy Traced Tubing

- For “winterization” and maintaining temperatures to 400°F (204°C).
- Rapid heat-up capability
- Predictable heat transfer from tracer
- Uniform temperature along entire length.
