

## Natural Gas Liquids Standards

DCG prepares a wide variety for Natural Gas Liquids Standards. These standards are gravimetrically prepared and N.I.S.T. Traceable by weight with the gravimetric values verified by one or more analytical methods. Four gravimetrically prepared, N.I.S.T. Traceable by weight Hexanes Plus Fractions are available. In addition to being N.I.S.T. Traceable by weight, the gravimetric values for the Hexanes Plus Fractions are also verified by one or more analytical methods. The following standards are examples of what DCG prepares. Please call your DCG Technical Specialist for assistance in determining the composition of a standard that meets your needs.
