

## Total Acid Number Quality Control Check Standard for Biodiesel Fuels Analysis using ASTM Method D 664

DCG has available an NIST traceable by weight, gravimetrically prepared, quality control check standard for ASTM Method D 664 – the Analysis of the Total Acid Number of Petroleum Products by Potentiometric Titration. This standard is for use in the Biofuels industry. The check standard, in addition to being gravimetrically prepared and N.I.S.T. traceable by weight, has been verified by one or more analytical methods. Custom standards are available upon request.

**Part #: ASTM D 664 Check Standard:  
\$100.00**

Contains the following in a 1 Liter amber bottle:

0.3 mg Propionic Acid in Mineral Oil.
