

## Low Sulfur in Gasoline Calibration Standards

In order to assist refiners in complying with the requirements of EPA 80.190 to 80.415 of TITLE 40 – PROTECTION OF ENVIRONMENT CHAPTER 1 – ENVIRONMENTAL PROTECTION AGENCY PART 80 – REGULATION OF FUELS AND FUEL ADDITIVES, DCG has available calibration kits and check standards containing Sulfur Gasoline Calibration Standards.

Three calibration kits are available along with three check standard kits. Custom standards are also available upon request. All are in a gasoline matrix and packaged in 5ml amber bottles. Each of these standards is gravimetrically prepared and N.I.S.T. Traceable by weight with the reported values verified by one or more analytical methods.
