

Ultra Low & Low Sulfur in Diesel Fuel Calibration Kits

In addition to Low Sulfur Diesel Qualification Standards and Samples to meet the requirements of EPA 80.580 – 80.585, DCG offers low sulfur in diesel fuel calibration kits. Each standard is gravimetrically prepared and N.I.S.T. Traceable by weight. Gravimetric values are verified by one or more analytical methods. The density of the diesel fuel matrix is provided with each kit. Three calibration kits are available. The kits are as follows:

Part #: Cal Kit ULSD 1-20: \$645.00

Calibration Kit for Ultra Low Sulfur in Diesel Fuel for the 1-20 ppm range.
All packaged in 1 oz. amber bottles. Each bottle contains approximately 20 ml. of product.

Blank

- 1.0 ppm w/w Total Sulfur from Di-N-Butylsulfide in Diesel Fuel
- 2.5 ppm w/w Total Sulfur from Di-N-Butylsulfide in Diesel Fuel
- 5.0 ppm w/w Total Sulfur from Di-N-Butylsulfide in Diesel Fuel
- 10.0 ppm w/w Total Sulfur from Di-N-Butylsulfide in Diesel Fuel
- 15.0 ppm w/w Total Sulfur from Di-N-Butylsulfide in Diesel Fuel
- 20.0 ppm w/w Total Sulfur from Di-N-Butylsulfide in Diesel Fuel

Part #: Cal Kit ULSD 20-100: \$500.00

Calibration Kit for Low Sulfur in Diesel Fuel in the 20-100 ppm range.
All packaged in 1 oz. amber bottles. Each bottle contains approximately 20 ml. of product.

Blank

- 20.0 ppm w/w Total Sulfur from Di-N-Butylsulfide in Diesel Fuel
- 35.0 ppm w/w Total Sulfur from Di-N-Butylsulfide in Diesel Fuel
- 50.0 ppm w/w Total Sulfur from Di-N-Butylsulfide in Diesel Fuel
- 75.0 ppm w/w Total Sulfur from Di-N-Butylsulfide in Diesel Fuel
- 100.0 ppm w/w Total Sulfur from Di-N-Butylsulfide in Diesel Fuel

Part #: Cal Kit LSD 100 – 500: \$500.00

Calibration Kit for Low Sulfur in Diesel Fuel for the 100-500 ppm range. All packaged in 1 oz. amber bottles. Each product contains approximately 20 ml. of product.

Blank

100 ppm w/w Total Sulfur from Di-N-Butylsulfide in Diesel Fuel
200 ppm w/w Total Sulfur from Di-N-Butylsulfide in Diesel Fuel
300 ppm w/w Total Sulfur from Di-N-Butylsulfide in Diesel Fuel
400 ppm w/w Total Sulfur from Di-N-Butylsulfide in Diesel Fuel
500 ppm w/w Total Sulfur from Di-N-Butylsulfide in Diesel Fuel
